

DuPage Water Commission Attends Argonne National Laboratory for Earth Day

Date: April 22nd, 2010

On Wednesday, April 21st, 2010, DuPage Water Commission Water Preservation Group Members, Jenessa Nesbitt and Carolyn Johnson were in attendance as an exhibitor for Earth Day for Argonne National Laboratory employees. The display from the Commission as well as other Earth-friendly displays was set up on the way into the lunch area so the Argonne employees could peruse through them on the way to lunch.

Around 30 informational pamphlets about toilet leaks, lawncare, indoor/outdoor water use, and a water quiz were handed out. About 50 5-minute shower timers, 50 rain gauges, and 50 toilet leak detection tablets were distributed. Many people were excited to see rain gauges and shower timers were developed and thought that these products were great ways to save water.

See below for photos from the event.
